

## PRODUCT OVERVIEW

### **RHINO MK II**

#### **SAFEGUARD YOUR VALUABLES AND IMPORTANT DOCUMENTS FROM THE THREATS OF BURGLARY AND FIRE IN YOUR HOME OR OFFICE.**

Rhino Mk II offers a combined certified protection against burglary and fire in one safe: certified EN 14450, Class S2 for burglary and EN 15659 LFS for fire protection (up to 1 hour).

You want a convenient and user-friendly safe that protects against burglary and fire for your cash, valuables, documents and vital records in your home or office. But you also need a tried-and-tested solution that does not compromise on security. Rhino Mk II from Chubb safes offers combined fire and burglary protection certified by ECB•S. The new-and-improved design has been enhanced to deliver optimal convenience and ease of use.

## **CERTIFIED RESISTANCE**

Combined certified protection against burglary and fire in one safe: certified EN 14450, Class S2 for burglary protection and EN 15659 LFS for fire protection (up to 1 hour).

## **CONSTRUCTION**

A robust and durable model that boasts an overall 65mm barrier thickness made up of a high-density monolithic casting contained within inner and outer steel casing. The solid composite 35mm-thick door secures access and is combined with additional protection plates to protect crucial locking areas. 28.5 mm diameter solid steel moving bolts secure the door to the body, while fixed "anti-heeling" bolts on the door's rear edge protect the hinge side.
