

## PRODUCT OVERVIEW

The Chubb safes Primus combines fire and burglar resistance in a single unit, offering the best of both worlds when it comes to protecting your cash and valuables. Certified to the Eurograde I security standard by the experts at the ECB-S, the Primus range is also fully AiS Approved. The ECB-S have also certified the Primus's ability to withstand heat and flame, giving it a 30 minute rating under the EN 15659 standard. This makes it perfect for papers and documents.

Electronic lock is rated Class B and features a time delay. To assist installation, the door of the Deca can be removed, making its weight much more manageable, reducing it by a total of 15%. Once the door is back in place correctly, the safe offers full security once more. The range also features an escutcheon, which is an additional plate of steel around the lock, to ensure total protection.
